## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10 and 20-28, drawn to metallocene, method of making, catalyst and polymerization process.

Group II, claim(s) 14-19, drawn to polymers.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons. The common feature within the claims of group I is a metallocene compound, whereas the claims of group II specify only polymers, and the polymer claims do not require, refer to, or in any other way depend upon the metallocene of group I. The two groups further fail to share a common special technical feature in that neither the metallocene nor the polymer defines a contribution which each of the claimed inventions, considered as a whole, makes over the prior art. Evidence for this assertion is found in the fact that the International Search Report has cited "X" references against both the metallocene claims and the polymer claims.

Art Unit: 1713

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
